

PHIL 176: Death (Spring, 2007)  
Professor Shelly Kagan  
Lecture 17 – Figures

Figure 17.1

- (A) Something can be bad for you only if you exist.
- (B) When you are dead you don't exist.
- So (C) Death can't be bad for you.

Figure 17.2

2.5 billion women x 30 x 12 eggs x 2.5 billion men x 50 yrs. X 365 days/yr. x 40  
million sperm = 1.5 million, billion, billion, billion  $(1.5 \times 10^{33})$

Figure 17.3

Modest: (A) Something can be bad for you only if you exist at some time or the other  
Bold (B) Something can be bad for you only if you exist at the same time as that thing
